Volvo Genuine I-Shift Transmission Fluid 75W-80

Volvo I-Shift Transmission Fluid 75W-80 (97307, 97318) is a high-performance transmission oil designed for automated manual transmissions and extending drain intervals.

Application:
Use in all automated manual I-Shift transmissions and older VT-type gearboxes. NOTE: not to be used in overdrive transmissions (ATO) for which the higher viscosity version (75W-90) must be used.
Furthermore, do not use in automatic transmissions including Allison transmissions.

Key Benefits of I-Shift 75W-80:
• The use of synthetic base oils and high-quality performance additives provide viscosity control and long oil drain capability.
• Provides improved fuel economy and reduces operating temperature.
• Effective oxidation resistance, even under severe conditions.
• Excellent protection against gear and bearing wear and surface fatigue (pitting).
