Volvo Trucks North America

Your first choice for Reman quality and value.

Volvo remanufactured components are a smart option. They deliver like-new performance on the road—and serious savings for your bottom line. For Volvo equipment, Volvo Reman is the go-to brand for selection, dependability and value.

The Volvo Reman inventory covers key categories from engines and transmissions to coolant pumps and turbo chargers. All built to Volvo factory standards and backed by our Volvo warranty. There's no better way to retain the 100% OEM quality your Volvo fleet deserves.

You can trust Volvo Reman parts. Here's why.

Volvo Reman components are fully remanufactured from top to bottom using Volvo factory-specified technologies and processes. The result is a 100% Volvo genuine replacement part that's tested and warranted for performance, reliability, and longevity—with the added advantage of substantial cost savings.

A PROCESS GUIDED BY OEM TECHNOLOGY.

- Core parts are inspected and cleaned using the latest techniques.
- Components are remanufactured to exact Volvo OEM/Reman specs.
- Remanufacturing incorporates the latest engineering updates.
- CNC computer-controlled machining ensures precision tolerances.

QUALITY CONTROL MEANS CONFIDENCE ON THE ROAD.

- Only the best Volvo original core materials are selected.
- All parts undergo a strict evaluation process.
- Finished products are thoroughly tested for performance, reliability, and longevity.

EXTENSIVE RANGE OF READY-TO-ORDER COMPONENTS.

- Volvo Reman maintains one of the most extensive inventories in the industry.
- Your Volvo dealer offers expert advice and fast access to the parts you need.
- Dealer locations across North America assure parts and service are always available.

WARRANTY COVERAGE YOU CAN COUNT ON.

- The Volvo North America warranty covers 100% parts and contingent damage.
- Labor is 100% covered when installed by an authorized Volvo Dealer.

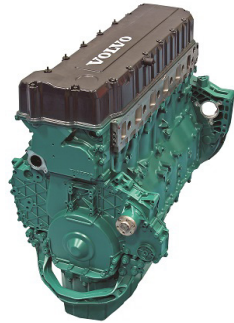

BETTER FOR THE ENVIRONMENT.

- Remanufacturing supports sustainability and a reduced carbon footprint.
- Reman uses up to 85% less material, and 80% less energy than new production.

100% Volvo quality. 100% Volvo genuine.

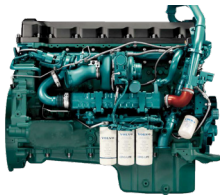

Volvo Reman is driven by Volvo's commitment to quality. Our factory-trained technicians use only Volvo Genuine Parts, ensuring the best fit and function to protect your vehicle's performance and value.

BASIC ENGINES

New and reman parts combine for optimum performance, reliability, and longevity. Includes reman cylinder block, cylinder head, crankshaft, connecting rods, oil pump and more.

| 2 Years / Unlimited Miles

7/8 ENGINES

Completely disassembled, cleaned, and remanufactured using 100% Volvo Genuine components. Dyno-tested and ready to install, with installation time savings of 1-3 days.

| 2 Years / Unlimited Miles

I-SHIFT TRANSMISSION

Available in four service configurations, each I-Shift solution is built using only Volvo parts and remanufactured by Volvo-certified technicians.

| 1 or 2 Years /
Unlimited Miles

CYLINDER HEADS

Castings are Magnaflux® inspected and pressure tested. Includes new valve guides and rotors. Valves and seats are machined precise OEM specs and tested for proper seal.

INJECTORS

Completely disassembled, cleaned, inspected, and tested to original Volvo specs.

Critical and high-wear components are replaced with 100% new Volvo parts.

COOLANT PUMPS

Updated to the latest engineering high-flow designs. Complete with impeller, gear and O-ring/gaskets. Bearings and seals are replaced with 100% new Volvo genuine parts.

CONNECTING RODS

Magnaflux inspected for ultra-fine cracks, CNC machined to ensure quality and proper surface finish. Crank bores and wrist pin bushings are restored to original size.

FLYWHEELS

Reman flywheels are a proven option that reduces I-Shift service cost. Each is cleaned, inspected, and remanufactured according to the latest engineering specifications.

TURBO

Units are disassembled, cleaned, and inspected. Any parts not up to Volvo specs are replaced with genuine new. Testing follows the strict process used in new production.

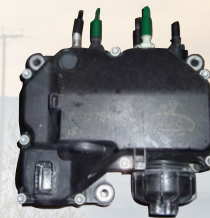

EGR VALVE

Valves are disassembled and cleaned using the latest technology. All critical components are replaced with new, including control valve, piston assembly, O-rings, and seals.

ENGINE CONTROL UNIT

Units are cleaned and inspected for visual damage. Old data files are deleted. After thorough testing, modules are remanufactured and updated to latest engineering specs.

DEF PUMP

Disassembled and cleaned using the latest technology. Components must pass rigorous inspections to meet Volvo standards. Critical, high wear items are replaced with new.

More options, less downtime. Volvo Reman makes it easy.

Volvo Reman is your best route for getting trucks back on the job quickly and affordably.

You'll have multiple options for components and assemblies, all available through the nationwide network of Volvo dealers. Contact the one near you to learn more.
