SIX-PACK INJECTOR KIT

Precision engineered for optimum performance with D11, D12, D13, and D16 engines

Why Buy a Six-Pack Injector Kit* by Volvo Reman?

Better Engine Performance

The Six-Pack Injector Kit by Volvo Reman includes the latest design and engineering upgrades. One hundred percent of components are inspected for optimum quality, tolerance and function. In addition, mandatory components are automatically replaced to control the injection event, which results in maximum performance.

Improved Fuel Efficiency

The increase in fuel economy delivered with a Six-Pack Injector Kit by Volvo Reman can add up to considerable savings on fuel cost — often enough to cover the cost of a Six-Pack Injector Kit in the first year alone. Our injectors produce maximum fuel atomization for complete combustion so you get more miles for your money.

Smoke Reduction

A Six-Pack Injector Kit by Volvo Reman helps ensure your engine meters the right amount of fuel to deliver a complete combustion, thereby reducing emissions.

Increased Uptime

Over time, injectors wear at approximately the same rate. Taking a proactive approach and installing a Six-Pack Injector Kit by Volvo Reman in a single service visit will save you time and inconvenience. You won't waste time on multiple service visits for the same problem, and can significantly reduce future downtime and subsequent lost revenue.

The Six-Pack Injector Kit by Volvo Reman is priced at a discount compared to buying individual injectors – just another way Volvo Reman saves you money.

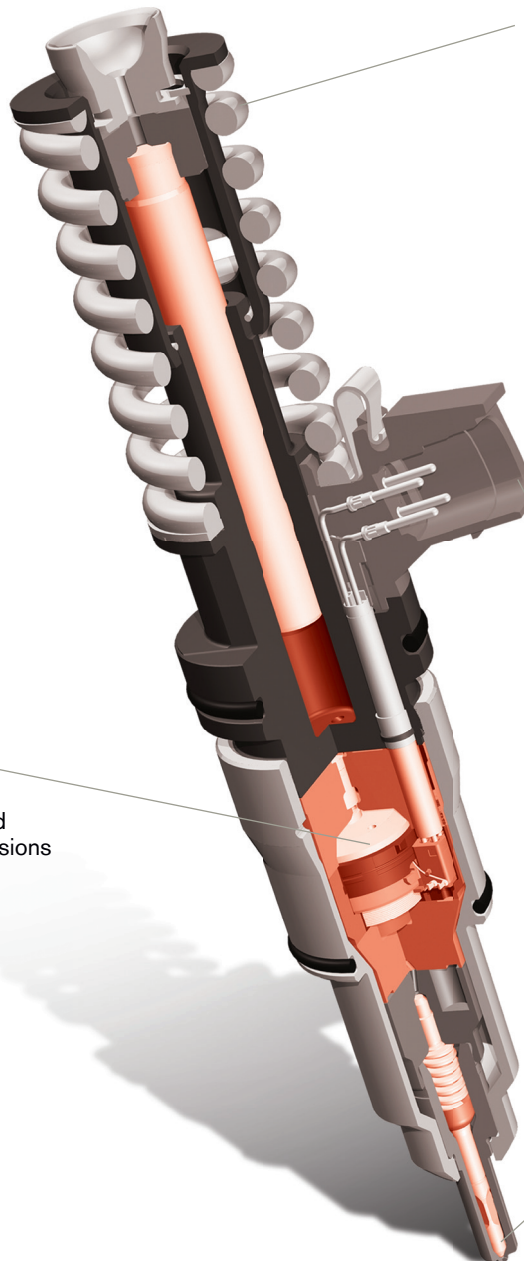

* Includes cup, o-ring and paste

SIX-PACK PERFORMANCE

Engineered with the latest updates to fit with the needs of your Volvo truck

When it comes to remanufacturing your engine, Volvo Reman puts quality before price. Don't run the risk of more downtime later just to save a few dollars now. Choose the quality only Volvo Reman can provide.

Our Six-Pack Injector Kit for Volvo Reman D11, D12, D13 and D16 engines combines both the highest-quality remanufactured parts, and 100 percent new spill valve and tip to provide the best possible performance for increased reliability and longer life.

Built to Perform

- Remanufactured in North America by certified Volvo Reman processes
- Produced following stringent processes including specialized ultrasonic cleaning process
- Comes with a one-year / unlimited-mile warranty when installed by an authorized Volvo Dealer. Warranty terms apply.

100% Tested to OE Specifications

- Using the same test equipment as Volvo production
- Exclusive testing method simulating "live" engine performance with 42 functional test steps
- Multiple detailed inspections to assure quality

100% New Spill and Control Valves

- Ensure proper fuel delivery and performance for reduced emissions

100% New Tip

- Ensure reliability and durability for the life of the injector and to increase fuel economy

PROTECT YOUR INJECTOR INVESTMENT WITH FUEL FILTERS
