

REMAN TURBOCHARGERS

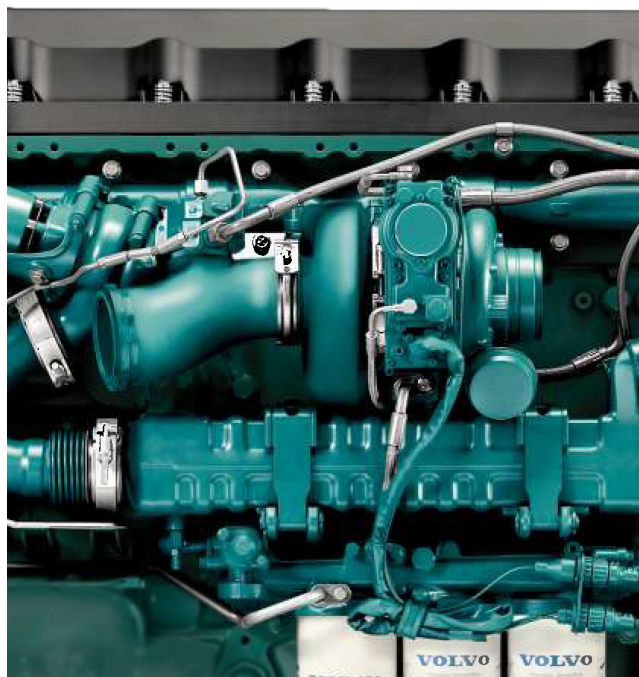

Delivering premium reliability, durability and performance

RESTORE YOUR POWER

To maximize truck performance, stay Genuine - don't risk increased fuel bills and unplanned downtime. Trust the quality that Volvo Reman provides.

Volvo Reman ensures that all turbochargers are remanufactured back to OEM or better standards by utilizing the most recent technology upgrades designed by Volvo engineers.

THE VOLVO REMAN PROCESS

The Volvo Reman turbocharger is tested throughout the entire remanufacturing process and is guaranteed to reach the performance requirements specified by Volvo.

This ensures a more efficient combustion, creating a cleaner exhaust, more usable power, improved fuel economy and altitude compensation. All turbochargers are completely remanufactured in North America with the highest standards.

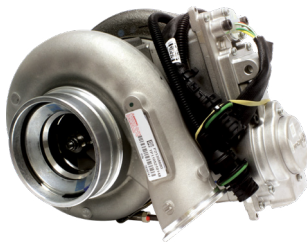

REMAN QUALITY

Restoring power and performance to your Volvo Truck

Non-Genuine Turbo Risks

- Damage to engine components such as after treatment systems, valves, pistons, etc.
- Increased fuel consumption
- Failure to meet emission standards
- High external oil leakage that could cause a fire
- Voiding Volvo’s warranty

Containment tests executed on third party turbochargers have not been able to meet all of Volvo’s safety and quality standards.

No Competition

Remanufacturing failure is most commonly due to errors in the process, which is why a quality process is Volvo Reman’s priority focus. Don’t gamble with your investment. Always choose a Volvo Reman turbocharger.

Use of a non-Genuine turbocharger jeopardizes the functionality of the truck and can incur large, unnecessary expenses.

The bottom line

The use of non-Genuine turbochargers in your Volvo truck simply risks more downtime. Choosing Volvo Reman quality will provide maximum uptime and engine performance.

Features	Benefits
<ul style="list-style-type: none"> • Remanufactured and optimized for fit, form and function of Volvo trucks 	<ul style="list-style-type: none"> • Lower failure rates than non-Genuine • Provides the longest life possible
<ul style="list-style-type: none"> • Tested and validated against Volvo’s stringent requirements for performance and emissions 	<ul style="list-style-type: none"> • Proven to provide the best performance • Ensures EPA compliance • Optimize engine performance
<ul style="list-style-type: none"> • Precise tolerances on the bearing-system both radially and axially 	<ul style="list-style-type: none"> • Maximizes bearing life and proper oil pressure, which reduces vibrations and minimizes the risks for oil leaks
<ul style="list-style-type: none"> • Correct tolerances and profile between the turbine / compressor blades and its housing 	<ul style="list-style-type: none"> • Optimized efficiency and lowest possible fuel consumption level • Maximize the life of the turbocharger
<ul style="list-style-type: none"> • All kits are sold with actuator and installation hardware 	<ul style="list-style-type: none"> • Simplifies ordering process • Actuator and all installation parts are delivered with turbocharger

Volvo’s standard warranty: 1 year / unlimited miles and includes labor when installed by a Volvo authorized dealer. Warranty terms apply.
