

WHY VOLVO REMAN?

Longer Life. Top Performance. More Uptime.

These are the traits you count on when you buy Volvo Reman. Our remanufactured parts are inspired by years of Volvo's commitment to superior quality, safety and environmental care.

At Volvo Reman, quality is in every part we sell.

Only the Best

Before a part is requalified, it undergoes a stringent quality control process. We look for signs of wear, hairline cracks or any other flaws that could affect performance. Only the best parts are selected for remanufacturing.

Unsurpassed Quality Control

Each component is completely disassembled, cleaned and inspected by Volvo Reman Technicians. Each part undergoes state-of-the-art crack detection and is precision machined where specified.

Experience that Counts

Volvo Reman products are remanufactured using the most advanced recovery techniques. Our technicians reassemble components that have passed our stringent cleaning and remanufacturing process and install new bearings, gaskets, seals and o-rings.

It's Not Ready Until It's Ready

All finished parts are subjected to calibration controls to ensure the correct torque specs are met. Assemblies are tested to be sure they meet Volvo's standards.

A Like-New Appearance

Precision painting ensures flanges, shafts and threads remain paint-free.

VOLVO REMAN PRODUCTS

All Volvo Reman products meet Volvo specifications and provide best-possible performance, increased reliability and longer life.
