CONNECTED SERVICES

Better data drives profitability

Volvo Trucks. Driving Progress

Always connected

The all-new Volvo VNL and VNR are our most connected Class 8 vehicles ever. You'll have true, real-time data thanks to our industry-leading, on-board telematics and diagnostics systems. Plus, industry-first technologies like the My Truck App and Volvo's E-Call system.

Connectivity increases your profitability through improved fuel efficiency, enhanced safety, streamlined maintenance, and faster customer response time. Because the more you know about your vehicles, the better decisions you make.

78.9 ± 18.3 82.0 ± 16.3 -1.55 120

We put the power in your hands

In an industry first, drivers of the next-generation VNL and VNR have remote access to their vehicle through the My Truck App. The innovative application allows the driver to optimize their workday, quickly and easily readying the vehicle for the route ahead.

Light status can be checked remotely, without having to enter the truck to select lights for pre-trip. The My Truck App also offers peace of mind with less time spent outside a truck parked in remote or unfamiliar areas, especially at night.

**The My Truck App allows you to view truck status
and adjust a variety of settings right from your mobile device:**

- Fuel, oil, and DEF levels
- Cab temperature (heat or A/C)
- Lighting system
- Coolant level and washer fluid level warning/notification

There when you need us most

Introducing Volvo's E-Call system

Volvo's new E-Call feature is the first Class 8 system designed to make an automated call to an emergency services 911 operator if the truck has been in a rollover or had an airbag deployment.

No driver initiation is required. It can automatically share that the event has occurred, along with location information, wherever cell coverage is available.

The E-Call system comes standard in all VNL and VNR models.

The system matches with the closest public safety answering point and can provide a callback number to the cab for emergency services.

In addition to the automatic call after a rollover event or deployment of the airbags, you can also choose a manual SOS switch for driver use as well.

The optional switch allows drivers to manually connect to 911 directly.

Volvo Connect

Always in touch with your operation

Stay completely connected to your fleet operations with Volvo Connect, your all-in-one portal to Volvo Trucks’ digital services. Enjoy peace of mind knowing that your vehicles are up and running. With instant access to the status of every Volvo truck in your fleet, you can easily track their progress and performance every mile.

Volvo Connect provides a digital suite of state-of-the-art services and features. You and your team have easy access to reports covering vital fleet information, including truck performance, fuel efficiency, and safety. That means everyone in your business can use Volvo Connect to make good, data-based decisions.

Volvo Connect’s clean and intuitive interface is easy to navigate. At log in, you’ll find a clear overview of the information and services vital to your business. You can also organize the screen to prioritize preferred services for the most useful view of your operation.

Volvo Connect

Assets

Get an instant overview of all Volvo trucks in your fleet, as a group or vehicle-by-vehicle. Easily view subscription status of each truck.

Reports and analytics

With our easy-to-read reports, you can quickly monitor your fleet's fuel and safety data. Analyze trends to reveal key performance metrics and improve vehicle efficiency.

Software status and updates

With Remote Programming, you already had the ability to update software and parameters without taking your truck out of service. Now, with the new Volvo Connect portal, you can instantly see software status on each Volvo with a 4G Telematics Gateway and adjust accordingly. Staying updated prevents downtime and keeps your trucks on the road.

Remote Diagnostics

Volvo Connect provides visibility to Remote Diagnostics events including fault code information and repair instructions. The portal also provides full details on Volvo ASIST cases.

Location services

Monitor all your vehicles in near real-time. Access vehicle and route information including truck speed and location, fuel level, odometer and engine hours, historical route data, and more.

Supporting your entire organization

Volvo Connect opens up a world of services and functions. You can choose one of the dynamic, combined view options to layer your data for a holistic view of your fleet operations.

History repeats itself

The first VN debuted in North America in 1996 and quickly turned the trucking industry on its head. Other truck makers spent the next decade playing catchup to our innovations. The all-new Volvo VNL and VNR represent another leap forward, with hundreds of next-generation features you can use to improve your productivity and profitability.

In addition to the connected services innovations covered in this brochure, here are some additional highlights in our next-generation vehicles:

- Revolutionary aerodynamics and powertrain innovations that improve fuel efficiency by up to 10% in new VNLs and up to 7.5% in new VNRs versus previous models
- A completely redesigned suspension system that provides our smoothest ride ever
- The first-of-its-kind Volvo Blue Service Contract with predictive maintenance to improve uptime
- Interior and exterior design that stops you in your tracks, conveniently packaged into trim levels for easy decisions
