TRIM LEVEL GUIDE

Volvo VNR Series Options

Volvo Trucks. Driving Progress

Overview

We've combined exterior and interior design choices in the VNR's two new trim level options. It makes the spec'ing process quicker and easier than ever. And it guarantees your trucks make a great impression. Your interior trim level will come with a designated technology and amenity package. Both VNR trim levels offer customization options on features and packages.

So, select your cab model, pick a trim level, and choose a paint color. With a few easy decisions, you're building a VNR that's perfect for you.

To customize a truck for your operation, try the new [Volvo VNR configurator](#) or consult with your Volvo Trucks dealer.

Core Trim Level

Our Core trim option is ideal for carriers with multiple drivers frequently moving in and out of the cab. Choosing the Core trim level signals to your customers that they can expect hard work and dedication when you show up at the dock.

Core is a practical and stylish choice with many exterior trim pieces that never require painting during repair or replacement. Inside the cab, Core is more than ready for tough delivery routes. The neutral Fathom Blue and Logan Grey color scheme is easy to clean and hides the use that comes with multiple daily stops.

Edge Trim Level

The bold styling in the Edge trim level begins with a gloss black grille and a Satin Chrome surround. The bumper and air intakes continue the sleek look. Cab mirrors, hood mirrors, and chassis fairings all provide a more upscale image in matching body color paint.

The Edge interior comes with both Technology Package 1 and Amenity Package 1 for the new VNR, featuring a host of upgraded features including premium audio.

Exterior

| | Core | Edge |
|--------------------|---------------------------------|---|
| Grille mesh | Matte black | Gloss black |
| Grille surround | Gloss black | Bright chrome |
