Applying Injector Trim Codes using Scan Tool

- Place the cursor in the correct trim code field
- Clear the previous code
- Scan the injector barcode
- Check that the correct injector trim code has been updated.
- Update the current trim code for all relevant injectors
- Click Start ▶ to program all the injector trim codes to the Engine Control Module.

NOTE: US16 and previous engines use the E3 Unit Injectors, they are 9 character. When scanned using the scan tool a 39 character string length trim codes will display in the injector field.
